

Games SEO Update (OpenAI + n8n)

Этот workflow автоматизирует процесс генерации и обновления SEO-контента для игр в базе данных, используя OpenAI и MySQL. Он запускается по расписанию каждые 30 минут и добавляет или обновляет SEO-данные для игр, у которых они ещё не созданы.

Основные функции

1. Запуск по расписанию
 - Узел **Schedule Trigger** иницирует процесс каждые 30 минут.
2. Получение активных языков
 - Узел **GetActiveLanguages** выполняет запрос:

```
SELECT lang_code, language_name
FROM supported_languages
WHERE is_active = 1;
```

3. Выбор игр без SEO
 - Узел **GetGamesWithoutSEO** получает до 5 игр, для которых отсутствуют записи в `providers_games_seo`:

```
SELECT pg.gameID, pg.game_name, pg.game_description, pg.provider_id, pg.game_code
FROM providers_games pg
WHERE pg.launch_enable = 1
AND NOT EXISTS (
  SELECT 1 FROM providers_games_seo pgs
  WHERE pgs.game_id = pg.gameID
  AND pgs.lang_code = '{{ $json.lang_code }}'
)
LIMIT 5;
```

4. Подготовка данных

- Узел PrepareGameData форматирует данные игр для последующей передачи в модель.
- 5. Генерация SEO-контента (OpenAI)
 - Узел Generate SEO Content обращается к языковой модели gpt-4.1-mini через узел OpenAI Chat Model.
 - Запрос к модели:

Create SEO content for the game:

Game Name: {{ \$json.game_name }}

Description: {{ \$json.game_description }}

Language: {{ \$('GetActiveLanguages').item.json.lang_code }}

Please provide output in JSON format with:

- seo_title (up to 60 characters)
- meta_description (up to 160 characters)
- seo_url
- h1_title
- short_description (2-3 sentences)
- full_description (4-5 sentences)
- keywords (5-7 relevant keywords)

- 6. Обработка и парсинг ответа
 - Узел Prepare SEO Data парсит JSON из ответа OpenAI и подготавливает структуру для записи в базу данных.
- 7. Обновление или вставка данных
 - Узел Insert or update rows in a table выполняет UPSERT в таблицу providers_games_seo:
 - Обновляются поля seo_title, seo_description, keywords, seo_slug, h1_title, og_description, updated_at и др.

Используемые узлы

Узел Назначение

Schedule Trigger Запускает процесс каждые 30 минут

GetActiveLanguages Получает список активных языков

GetGamesWithoutSEO Получает игры без SEO-записей

SyncGames Проверяет наличие данных

PrepareGameData Форматирует данные игр

Generate SEO Content Генерация SEO-текста через OpenAI

Prepare SEO Data Парсит и подготавливает результат

Insert or update rows in a table Обновляет или вставляет записи в БД

OpenAI Chat Model Модель gpt-4.1-mini для генерации контента

Требуемые credenшелы

- MySQL account — подключение к базе данных с таблицами:
- providers_games
- providers_games_seo
- supported_languages
- OpenAI account — API-ключ для доступа к модели gpt-4.1-mini.

Логика выполнения

Schedule Trigger

- GetActiveLanguages
- GetGamesWithoutSEO
- SyncGames
- PrepareGameData
- Generate SEO Content (OpenAI)

- Prepare SEO Data
- Insert or update rows in a table

Расписание

- Интервал: каждые 30 минут
- Время можно изменить в узле Schedule Trigger → minutesInterval.

Результат

После выполнения workflow:

- Все новые игры получают уникальный SEO-контент.
- Таблица providers_games_seo обновляется с новыми значениями:
- seo_title
- seo_description
- keywords
- h1_title
- seo_slug
- updated_at
